

DD Electro Mechanical Feeders

DD Electro Mechanical Feeders – Powerful, effective delivery of bulk materials

Locker DD Electro Mechanical Feeders offer powerful, effective delivery of bulk materials. ATEX rated, robust and reliable. Available with or without our Hopper Interface and fully dust sealed where requested, please contact Locker Wright for full details and individual requirements.

Reliable and Robust

Locker DD Electro Magnetic Feeders are reliable and robust machines with a wide range of sizes and throughputs. We manufacture our machines in house, in a range of material including high quality carbon steel and 304/316 grade stainless steel.

Our machines are equipped with easily replaceable wear liners in a range of materials – including stainless, AR400 and Chrome Carbide plate. DD Electro Magnetic Feeders can be supplied fully ATEX rated and are available with or without our hopper interface and full dust sealing where requested.

Incorporating years of experience in the field of vibrating feeders and conveyors, Locker have put vibration to work at new levels of improved efficiency. Our DD Electro Mechanical Feeders offer robust design and construction with varied configurations.

UK based sales, manufacture, service and parts supply ensure Locker Wright has the solution for you.

Advantages

- Option of ATEX rating
- Reliable and Robust
- High capacity
- Local or remote control options
- Limited control of flow from 50-100% max throughput
- Available with our plug breaking control unit
- Hopper Interface available
- Fully enclosed and dust sealed options available
- Suspended or foot mounted
- Wide range of throughputs – from a few kg per hour to 1000tph plus
- Standard and bespoke pan sizes and machine designs
- Low maintenances
