

Grisly Screen Feeders

Grisly Screen Feeders, effective & reliable isolation of over / under sized products

Grisly Screen Feeders offer the high capacity, reliability and low running costs of our SFH feeder units and are an ideal solution to secondary crushing applications, to remove over / under sized materials from the product stream. Please contact us for full details and individual requirements.

Robust and Reliable

Based on our legendary SFH feeders, our Grisly Screen Feeders offer simple, robust and reliable isolation of over / under sized material.

Offering 0-100% of available flow control and constructed in a range of materials including high quality carbon steel, stainless 304 & 316. Ideal for heavy duty applications.

Incorporating years of experience in the field of Electro Vibrating Feeders, Locker have put vibration to work at new levels of improved efficiency.

Utilising Natural Frequency to maximum advantage, the unique Locker Super Feeder design gives you more feeding capacity at lower costs per conveyed ton.

Advantages

- High Capacity
- Bespoke pan design dependent on process requirements
- Heavy Duty, Reliable and Robust
- Local or Remote Control options
- Suspended or Foot Mounted
- Low Running Costs and Virtually Maintenance Free
- No Rotating Parts / Lubrication Free
- Quiet Operation
- Withstands Head Loads
- Infinitely Variable Control
- Operation Unaffected by No Load Condition
